

NATURAL AREA PRESERVATION

Protecting and restoring Ann Arbor's natural areas and fostering an environmental ethic among its citizens

Volume 18, Number 4
Winter 2013-2014

The Complex Story of Greenview Nature Area; Past, Present, and Future

Dana Wloch

I stood in Greenview Nature Area, enjoying one of the last nice days of autumn. Park Steward Jim Rogers handed me an apple from one of the old trees in the park. He told me this was a bad year for worms—surely a good sign. The apple was full of flavor, and to my gratification, free of worms. Where we stood was once a thicket of buckthorn surrounding the old apple tree, indicated only by the dozens of cut stumps nearby. For several years, Rogers has been working ceaselessly with a group of Greenview devotees called Friends

A path through Greenview Nature Area.

photo: Jim Rogers

of Greenview. Most of the labor and improvements to Greenview are coordinated and executed by Friends of Greenview, and general management is directed through collaboration between the city and Ann Arbor Public Schools.

Owned by Ann Arbor Public Schools, Greenview includes meadows, woodlands, a pond, and a community garden, and has a complicated history. It is part of a

larger property, which stretches from Main Street to Greenview Drive, an area which was once a nine-hole golf course. This piece of land includes Greenview Nature Area, Pioneer Woods, Pioneer Prairie, as well as Pioneer High School.

NAP PROGRAMS

Along with the Park Steward program and public workdays, NAP offers many options for you to volunteer for nature!

On pages 4-5, find out about trainings and kickoffs for NAP's special programs, such as the Volunteer Burn Crew, and the Frog and Toad Survey.

Happy Birthday to NAP!

You may have noticed from the past few issues of the NAP newsletter, that NAP just celebrated its 20-year anniversary, or was it a 20-year birthday? As I pondered this question during the 2013 festivities, I realized that it's an important issue to resolve.

In my experience, and without any additional research into the matter whatsoever, it seems that anniversaries are often accompanied by sentiments such as, "Congratulations." "You've made it!" and "Wow, has it really been that long ...". The focus seems to be on the past, looking back on where you've come from, celebrating past accomplishments.

Birthdays, on the other hand, have none of that, especially not at NAP's exciting age of 20 years old! These are the years of new opportunities. We earn the right to start driving around the age of 16. At 18 we're considered legal adults and enjoy many of the rights, and responsibilities of that new age, although we don't earn the privilege of drinking alcohol until we turn 21. Birthdays are forward-looking. They mark the arrival of a new era. We expect our lives to change as we hit those milestone ages. And people expect more of us from that point onward.

In that sense, I hope that what we've just celebrated is NAP's 20th *birthday*, rather than its *anniversary*. It *is* the start of a new era here at NAP, with new rights and responsibilities to accompany our entry into this third decade of work.

People expect more of us now, and they should. We're "grown up" now. We're a much broader and more complex organization than we were ten years ago, or even five. And we're running more programs and workdays, working with many more volunteers, and reaching out into more sectors of the community than we ever did before.

Yes, we *have* accomplished much together over the past 20 years. There *is* much to celebrate. But our focus has to be on where we're headed the next 20 years – that's where the real excitement lies!

So wish us a Happy Birthday next time you see us. Then come join us as we create the next two decades together!

-David Borneman, *NAP Manager*

It *is* the start of a new era here at NAP, with new rights and responsibilities to accompany our entry into this third decade of work...We're a much broader and more complex organization than we were ten years ago, or even five.

VOLUNTEERS of the SCORE

(20 YEARS)

Although thousands of people have volunteered with NAP in the past 20 years (a “score”), these volunteers and groups deserve some special recognition!

JUST A FEW WAYS VOLUNTEERS OF THE SCORE HAVE CONTRIBUTED TO NAP

- Volunteered an **outstanding** number of hours in the field, or in the NAP office
- Recruited volunteers who worked an **extraordinary** number of combined hours
- Lead volunteers who worked a **monumental** number of combined hours
- Monitored a **significant** number of hours for salamanders, frogs, turtles, or birds
- Effected a **remarkable** impact on NAP’s restoration and education efforts
- Mentored, advised, or **inspired** NAP’s volunteers and staff

VOLUNTEER STEWARDSHIP CALENDAR WINTER 2013-2014

Volunteers assist NAP in all aspects of our work. Community involvement is vital to the success of NAP's conservation and education efforts. Please join us for one of these events!

For all of our **Stewardship Workdays**, please wear long pants and closed-toe shoes. Workdays are **free** and suitable for all ages. Minors must be accompanied by a guardian or have a signed release form. Contact NAP for release forms. Tools, snacks, and know-how provided.

JANUARY

January 20, Monday
Martin Luther King Jr. Day of Service
Furstenberg Nature Area
1:00 pm to 3:00 pm

Martin Luther King Jr. Day of Service is an opportunity to make your day "off" a day "on" for community service. Help remove invasive shrubs! Meet in parking lot on Fuller Rd., across from Huron High School.

January 25, Saturday
Citizen Pruner Training
Wheeler Service Center
4251 Stone School Road
9:00 am to 3:00 pm

Love trees? Want to learn a new skill? Looking for a new and unique way to volunteer in the community? Consider becoming a Citizen Pruner! Citizen Pruners volunteer during city-sponsored work days to care for newly planted city trees by pruning, monitoring, and providing general tree care. Don't worry if you don't know much about tree care, we will teach you everything you need to know and provide the tools! Training includes both indoor and outdoor time, so come prepared to be comfortable in both settings. Please register by January 24, troselle@a2gov.org or (734) 794-6627.

FEBRUARY

February 25, Tuesday
Public Meeting
Controlled Ecological Burn Program

Traverwood Branch of Ann Arbor District Library
3333 Traverwood Drive
7:00 pm to 8:30 pm

Fire is used as a restoration tool in many of Ann Arbor's natural areas. This meeting will be a discussion about the Controlled Ecological Burn Program. Ask questions, learn more about benefits of burning, and hear about the specifics of effectively and safely using fire as a restoration tool.

February 27, Thursday
Volunteer Crew Training
Controlled Ecological Burn Program

Leslie Science and Nature Center
1531 Traver Road
12:00 pm to 5:00 pm

Become a part of NAP's Volunteer Burn Crew! This is the **required** training session for anyone interested in assisting with NAP's controlled burns. Burns typically take place Monday through Friday between 12:00 pm and 5:00 pm. Registration is required by February 25, as enrollment is limited. Call (734) 794-6627 or email NAP@a2gov.org to register or for more information.

STEWARDSHIP NETWORK
STEWARDS' CIRCLE

7:30 am to 8:30 am

Second Tuesday of every month

Bruegger's Bagels

709 N University Ave

Are you interested in learning more about how to care for natural areas?

Then join the Stewardship

Network's Huron Arbor cluster for an informal discussion on a monthly topic with volunteer and

professional land stewards, plus others interested in nature. Free and open to anyone interested.

www.stewardshipnetwork.org.

December 10: New Invasive Plants

Do you know which plants are poised to be our next invaders? Join us for a chat about the latest invasive species and resources to stay up to date.

January 14: Management Plans and Resources

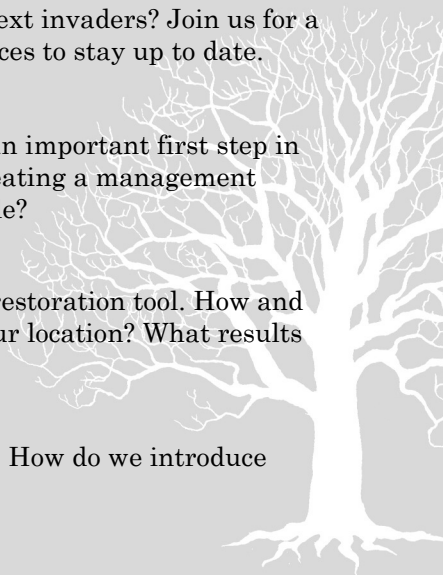

Creating a comprehensive management plan is an important first step in any restoration project. How do you go about creating a management plan? What are some resources that are available?

February 11: Prescribed Fire

Prescribed fire is our most historically accurate restoration tool. How and when do we use prescribed fire? Is it right for your location? What results have you had from prescribed fire?

March 11: Propagating Native Plants

Plants are one of the powerhouses of ecosystems. How do we introduce native plants? How are they propagated?

MARCH KICK-OFFS AND TRAININGS

Kick-offs and trainings are held at the Leslie Science and Nature Center, 1831 Traver Road.

Please register for all Kick-offs and Trainings by contacting NAP at (734) 794-6627 or NAP@a2gov.org. Trainings may have indoor and outdoor portions, so please dress for the weather.

March 2, Sunday

Salamander Survey Kick-off Training

12:00 pm to 2:00 pm

Did you know we have at least five species of salamanders in Ann Arbor? If you have some identification experience and a willingness to get muddy, please help us monitor their population and the health of their habitats. Surveying is done three to six times during early spring at multiple sites, and each round takes a few hours. Please register by February 28.

March 2, Sunday

Frog and Toad Survey Kick-off Meeting

3:00 pm to 5:30 pm

Please join us to help monitor frog populations in Ann Arbor. It's fun to learn how to identify the frogs of Michigan by ear and eye. Surveying is done three to six times from early spring through June at multiple sites, and each round takes a couple of hours. No previous experience required. Family-friendly. Please register by February 28.

March 15, Saturday

Photo Monitoring Kick-off

10:00 am to 11:30 am

Do you like photography and spending time outdoors? Photo monitoring may be the perfect volunteer opportunity for you! We need volunteers to take beautiful photos at specific locations each season to record and track the progress of our restoration work. You must have your own digital camera. Come join us at this informational meeting for more details about this volunteer opportunity! Please register by March 14.

March 15, Saturday

Workday Leader Training

12:00 pm to 5:30 pm

For volunteers interested in leading and/or co-leading NAP volunteer stewardship workdays. We will focus on procedures, ecological considerations, tips and tricks to lead a successful event. An interest and background in ecology (and plant ID) is strongly desired, but not required. A strong commitment to preserving the environment, while fostering community and engaging the public are necessary. Minimum age of 18. Please register by March 14.

Have you ever wondered what birds you might see in a particular nature area? Now you can find out online, thanks to NAP Breeding Bird Survey volunteers and Cornell University's eBird website!

Since 1995, NAP volunteers have surveyed many of our natural areas. In the spring of 2013, NAP Inventory Specialist Chris McCreedy uploaded NAP's bird data to Cornell's eBird system.

From the website: "A real-time, online checklist program, eBird has revolutionized the way that the birding community reports and accesses information about birds. Launched in 2002 by the Cornell Lab of Ornithology and National Audubon Society....eBird's goal is to maximize the utility and accessibility...of bird observations made each year by recreational and professional bird watchers."

Restoring Greenview Nature Area

CONTINUED FROM PAGE 1

In 1953, the land was acquired by the University of Michigan to build Pioneer High School, and soon the question of land management arose. The City became involved when they agreed to mow Greenview biweekly. Today Greenview is mown only once a year in order to promote species diversity.

Friends of Greenview is a 501c3 organization that predates NAP, and as fiercely dedicated volunteers they are the driving force behind countless improvements at Greenview. Once NAP was established, the two organizations were able to work together to combat invasives with new techniques. For instance, prescribed fire is now used to control invasive shrubs in the oak-hickory forest of Greenview Nature Area and Pioneer Prairie, and NAP hosts two yearly public workdays (spring and fall) for controlling invasives.

The biggest challenges facing Friends of Greenview are the large swaths of buckthorn present. Rogers has taken on this challenge, evidenced by giant piles of dead buckthorn waiting to be chipped. Taking out large patches of fruit-bearing shrubs does remove habitat for some migratory birds. But not to worry, Friends of Greenview has received grants from DTE Energy and the Michigan Department of Natural Resources to remediate those areas with native plants. Among these, dogwood (*Cornus* spp.) and crabapple (*Malus* spp.) are the most ecologically important for migratory songbirds.

In addition to controlling invasives and planting natives, Friends of Greenview has plans to increase the herpetological diversity of the pond, as well. They are working with a herpetologist, to reintroduce Northern Leopard Frogs into the

Greenview pond. Depending on the weather and hydrologic conditions of the pond, egg masses will be introduced in the spring of 2014.

Greenview is utilized by the classes at Pioneer High School as an outdoor science classroom, all the while learning the intrinsic and ecological value in restoration projects. In one simple – yet edifying – activity, a class monitors the ground water levels near the Greenview pond with wells. Students are then able to form connections between weather and the amount of water available in an ecosystem. Pioneer students are also given the opportunity to use class time to help remove invasive shrubs, fostering the environmental ethic necessary to appreciate the natural world.

As NAP volunteers know all-too-well, buckthorn is not a plant that is easily defeated, and the long-term management goals of Greenview necessitate help from many hands. It requires years of dedication to clean out an area. Even then, the birds will always be there to plant more. "You might have ambitions to get rid of the buckthorn," Rogers points out, "but what comes after that?" The only way to ensure the integrity of the ecosystems at Greenview is through the continuous help and diligence of Ann Arbor's citizens. "People love this place," says Rogers. And to that, we add, "protect what you love."

STAFF UPDATES

WELCOME...

BECKY GAJEWSKI Stewardship Specialist

I am very excited to join the team at NAP as a Stewardship Specialist! I've always had a strong interest in learning about nature and ecological restoration, and that naturally led me to Ann Arbor to pursue my bachelor's and master's degrees from U of M's School of Natural Resources and Environment. After

graduating, I spent three years completing natural resource management and restoration projects for the Huron-Clinton Metroparks. Now I am glad to return to Ann Arbor and give back to the city that has given me so much over the years.

QUENTIN TURNER Adopt-A-Park Coordinator

My background with community involvement began by working in the volunteer center of Eastern Michigan University, where I coordinated environmentally focused service opportunities for students with local non-profits and organizations including NAP. My passion for community service, social justice,

and native ecosystems has taken me across the country and as far away as New Zealand. I am greatly anticipating using my knowledge and skills to work with Ann Arbor's passionate park adopters.

ASHLEY CRAIG Field Crew

In 2012 I began volunteering with NAP in hopes of gaining local ecological knowledge and field experience. I am very grateful to say, I now have the opportunity to work with the NAP crew through the 2013 fall and winter season. Not only have my experiences as an intern this summer proven invaluable, but

working here is a constant reminder of why I have chosen biology as a field of study. Improving the world around us is something everyone should strive for. Lucky for me that's all we do!

Congratulations!

The Stewardship Network was awarded the Natural Areas Association's 2013 Carl N. Becker Stewardship Award! NAP has been actively involved in the Network since 1995, when it was just an idea. Dave Borneman, NAP Manager, has been on the Board since it began, and currently serves as President.

**MICHIGAN
COMMUNITY
SCHOLARS**
161 VOLUNTEERS

**GANDHI DAY OF
SERVICE**
125 VOLUNTEERS

GREENHILLS SCHOOL
95 VOLUNTEERS

Each year, NAP works with hundreds of volunteers in Ann Arbor's natural areas.

Sometimes, one private workday can bring scores of volunteers out to work. This fall, just four workdays totaled nearly 500 people!

NAP coordinated several types of work for each group at a handful of natural areas and

parks. Many volunteers used hand saws to cut buckthorn and honeysuckle to create space for native plants to thrive, and in most cases scattered the brush to allow for nutrients to be added back into the soil as they break down. Other groups trimmed back overgrowth along trails, and added woodchips to make the trails more accessible. Finally, smaller volunteer groups added mulch around trees in the open areas of the park to ensure the long-term health of the trees, and hand-weeded play areas to remove thistle and other unfriendly weeds.
