## **SECTION II - SCOPE OF SERVICES**

### **1. Objective**

The City of Ann Arbor is requesting proposals from professional civil engineering firms able to provide engineering services for the City's Public Works and Systems Planning Units on an as-needed project-by-project basis. The consulting engineer must be able to provide engineering, investigations, design, surveying, contract administration, inspection and oversight of various projects involving streets, parks, municipal buildings, solid waste management, water, sanitary sewer and stormwater systems within the City.

The City intends to award up to four (4) engineering service contracts. These contracts will be task based and consultants will be requested to submit letters of proposal on identified tasks for the City's consideration. Upon approval, the consultant will be authorized to complete the task under the terms and fee schedule included in the Professional Services Agreement.

The term of the contracts will be through June 30, 2026 with an optional extension for up to two (2) additional years. It shall be understood that the submitted hourly rates are to be honored over the term of the contract. If the contract is extended, a onetime cost escalator of no more than 3% may be added to the submitted rates. A written request from the Contractor at the end original contract period from will be required to consider any rate adjustments.

There will be no minimum value of services committed by the City for each awarded service contract. The total available budget for the term of the contract is approximately \$1,500,000 and will be divided amongst the selected firms in the City's best interest. The contract amounts are subject to the availability of funds and approval of annual budgets.

The City may utilize a staff engineer from the selected firms for on-site staffing support throughout the term of the contract. One on-site engineer would typically support the Systems Planning Unit and a separate engineer would typically support the Public Works Unit. While not expected to be physically located at the City of Ann Arbor full time, the engineers should be available to assist the City on a regular basis. The City will endeavor to provide workspace for the engineers, although work may also be completed remotely. The on-site engineer will be given access to the City's computer network and the necessary software to integrate into the City's systems.

The on-site engineers shall become fully knowledgeable with the City's Standard Specifications, policies and procedures, and organization such that they can effectively execute the tasks assigned to them with minimal oversight by the City. It is anticipated that approximately \$200,000 per fiscal year will be allocated specifically to tasks performed by each on-site engineer.

Respondents shall separately identify in their proposal if they are able to provide

staffing for an on-site engineer. It is not a requirement; however, preference will be given to those firms that can fulfill this need. Potential on-site engineering staff shall be specifically identified in the proposal with resumes and applicable billing rates. The City prefers entry to mid-level engineers with specific knowledge as it relates to the design and maintenance of drinking water, sanitary sewer and stormwater systems. The selected on-site engineers shall be available for the duration of the contract. No changes to the assigned on-site engineering arrangement shall be made without the written consent of the City.

No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement.
