Category Group 004

- White
- Henry
- State

ATC tested 22 total units in this category group. No lead-based paint was detected utilizing XRF methodologies in this group.

NOTE:

Components with XRF readings of 0.0 mg/cm^2 or below may contain lead below the detection limit of the XRF. Samples of coatings with XRF readings at or below 0.0 mg/cm^2 should be taken to be analyzed by AAS prior to renovation/demolition or other activities which may disturb paint/coatings.
