SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor is seeking professional services to perform surface condition rating services for the City of Ann Arbor street system, to develop statistical reports based on those ratings, and perform statistical modeling to advise the City on setting goals for future pavement condition.

The selected consultant will complete an evaluation of street network surface condition which will be used to inform capital improvements planning, asset management, and to report on progress toward pavement condition goals. The City utilizes Roadsoft software for its pavement asset management program. The consultant must perform the pavement condition rating utilizing Pavement Surface Evaluation and Rating (PASER) system for paved streets and the Inventory Based Rating System (IBR) for gravel streets. The City is seeking condition rating services in 2025 with the City reserving an option to extend the contract term for up to three additional ratings to be performed in 2027, 2029, and 2031.

Additionally, the selected consultant will support and advise city staff through the process of establishing pavement condition goals for the future, considering progress to date on existing goals, forecasted funding availability, and community expectations for pavement condition. The consultant must complete iterative scenario modeling to help the City determine realistic goals that improve condition on the Major and Local street network over a ten-year outlook. Existing goals are established through 2026. The City is seeking goal setting and scenario modeling support beginning Spring/Summer 2025 to establish updated goals by end of 2025; further analysis and modeling support may be needed throughout the duration of the contract.

The City Engineer or designee will oversee the direction and quality of work of this consultant.

SECTION II - SCOPE OF SERVICES

1. Background

The City of Ann Arbor's paved street system consists of approximately 110 miles of paved major streets, 201 miles of paved local streets, and 13 miles of gravel streets. Ann Arbor has 0.75 brick, 7.7 concrete and the rest of the paved system is asphaltic or composite pavement.

The City's pavement system was last rated in September 2023. Asphaltic, composite, concrete, and brick streets were rated on the PASER scale. Gravel streets were rated on the IBR scale. Pavement condition ratings are collected through the Roadsoft Laptop Data Collection (LDC) which assures ready communication of results with the Michigan Transportation Asset Management Council (TAMC).

The City first set goals for pavement condition in 2016, and updated those goals in 2021, looking forward to where the system could realistically be in 2026. Roadsoft modeling software was used for goal setting with an emphasis on available funding and what could realistically be achieved.

Current pavement condition and progress to date on current goals is available through an [online dashboard](#).

2. Objective

The City of Ann Arbor is seeking proposals for evaluation and rating of Ann Arbor's street network surface condition and support toward updating Ann Arbor's pavement condition goals. All streets paved in asphalt or concrete are to be rated using the PASER system. All gravel roads are to be rated using IBR. Brick streets shall not be rated.

3. Requirements

A. Meet the following minimum competencies:

- a. Provide a team credentialed with PASER certification.
- b. Demonstrate competency in rating pavement condition utilizing PASER
- c. Demonstrate general knowledge of IBR rating systems.
- d. Demonstrate competency in utilizing the Roadsoft LDC.
- e. Ability to complete condition ratings for the first year by mid-summer 2025.

B. Complete the Street Surface Condition Assessment

- b. Download the [Roadsoft LDC software](#) to a Consultant-owned laptop. The City will provide an LDC export of a Roadsoft filter that includes all pavement segments to be rated.
 - c. Rate all paved street segments using the PASER rating system and all gravel street segments using the IBR rating system. Input data directly to the LDC.
 - d. Review all work for completeness. Transmit files to the City containing the complete record of street surface ratings, after consultant review and QA/QC is complete.
- C. Conduct Surface Condition Analysis and Modeling
- a. Create a model for pavement condition assessment; the City will provide 2023 PASER rating data and current baseline funding.
 - b. Perform various pavement asset management modeling scenarios using Roadsoft, to advise the City on appropriate metrics, including but not limited to the following:
 - i. A 10-year outlook for pavement condition goals
 - ii. Independent goals for major and local streets
 - iii. An average overall PASER target
 - iv. A maximum % of roads in poor condition
 - v. A minimum % of roads in good condition
 - vi. Funding: What pavement condition could we achieve with \$X? – anticipate a minimum of 3 iterations
 - vii. Condition: What would it cost to achieve X pavement condition? – anticipate a minimum of 3 iterations
 - c. Propose additional metrics to track pavement condition, balancing the desire to set goals that are realistic and achievable with resources available, and the desire to achieve community expectations for pavement condition. Consider peer community approaches to setting pavement condition goals, as well as industry best practices.
 - d. The Consultant may propose alternate software for asset management and condition modeling to supplement Roadsoft capabilities or to be used in lieu of Roadsoft.
 - e. Advise the City on the setting of future pavement condition goals considering modeling results as specified in part a of this section. Note: condition assessment and scenario modeling is specific to paved surfaces, and does not include gravel streets.
