I have compared the original
Plan of Grand Rapids, and find
the Village of Grand Rapids
contains a mistake in the
width of Canal Street
allowing it from 47 1/2 ft to
50 ft.

Edw. Clark
Register of Lands

VI
VII

When the survey of the land was made in 1822, the
width of the canal was 47 1/2 feet. It was
found that the original plan of the village
of Grand Rapids contained a mistake in the
width of Canal Street, allowing it from 47 1/2
feet to 50 feet. The error was discovered
by comparing the original plan with the
actual survey of the land.
