## SECTION II

### BACKGROUND AND SCOPE OF WORK

#### BACKGROUND

The City of Ann Arbor plans to perform capital preventative maintenance and/or rehabilitation on the Fuller Road Bridge over the Norfolk Southern Railroad; the Maiden Lane Bridge over the Huron River; and, the E. Medical Center Drive Bridge over the Norfolk Southern Railroad during the 2015 construction season.

The three bridges were originally constructed in 1982 as part of the City of Ann Arbor's Fuller-Glen Reconstruction Project. The bridges consist of rolled steel, wide flange, beams with welded cover plates (the Maiden Lane Bridge does not include welded coverplates) and composite, reinforced, concrete decks. The bridges are three span structures that vary in skew angle, length (160'-0" to 261'-0") and out-to-out width (70'-11¼" to 81'-5"). The substructure of the E. Medical Center Drive Bridge and the Fuller Road Bridge consist of stub abutments with two, column bent, piers. The abutments are pile supported while the piers rest upon spread footings. The substructure of the Maiden Lane bridge consists of a curtainwall abutment on the south side, and a full height abutment with wingwalls on the north side, and two, wall, piers. The substructure elements are supported by spread footings except the south abutment which is pile supported. Steel sheet piling has been left-in-place at the upstream ends of the north abutment and piers to protect against scour.

Minor repair work has been performed upon the three bridges previously. Additionally, the University of Michigan has added a bank of conduits serving the Kellogg Eye Center to the underside of the Maiden Lane and Fuller Road Bridges in 2008.

The City has secured \$1,373,440 of STU funding in Fiscal Year 2015, as well as, \$789,650 of Local Bridge Program (LBP) funding in FY 2016 to finance most, if not all, of the expected construction costs. As stated previously, the city intends to construct the proposed improvements in 2015. To accomplish this task, given the 2016 LBP funding, the City expects to enter into a dialog with MDOT staff to possibly shift the LBP funds to 2015 should a previously approved project not be able to be constructed, or "advance construct" the project and be reimbursed in 2016. Regardless, it is the City's goal to construct the improvements utilizing FY 2015 funding. The City has its own funding sources that will be used to fund the city's share of construction costs and all engineering, testing, and inspection costs.

The expected construction activities consist of complete cleaning and coating of all structural steel components, replacement of highly-corroded structural steel members, replacement of pin and hangar assemblies (where applicable), replacement of existing expansion joint assemblies, pier cap replacement (where applicable), chipping and patching substructure concrete, scour analysis and the design of any needed counter-measures, deck patching and overlay, tree and brush removal, slope paving repairs (as required), rehabilitation of existing bridge railings with concrete chipping and patching and re-galvanization and painting of the existing steel railing tubes, guardrail upgrades, and other related work.

The bridges were last inspected in Fall 2013 and 2014 as part of the biennial Bridge Inspection Program. The Bridge Inspection Reports were prepared by DLZ Michigan, Inc..

We are now seeking proposals from qualified, professional engineering, consulting firms to perform the necessary tasks to prepare plans and specifications for submittal to the Michigan Department of Transportation (MDOT) in accordance with MDOT and City of Ann Arbor standards and procedures in order to competitively bid and execute the work as described below during the 2015 construction season.

While on-site construction inspection is not included in this contract, a consulting firm may be retained in the future, under a separate contract, to perform such services during the construction phase of this project.

### **SCOPE OF WORK**

In general, the following items will need to be addressed by the consulting firm, in accordance with Section III of this request and the attached project schedule (reference Attachment "C"):

1. Prepare complete, detailed, and accurate bridge rehabilitation plans and specifications meeting the requirements of the City of Ann Arbor, MDOT, AASHTO, Norfolk-Southern Railroad, and Amtrak in order to complete the project.
2. Establishment of all needed pay items and specifications for the proposed work. This will include unique pay items that properly detail all required work to be performed by the Contractor so that best management practices are followed in all areas of the proposed work. The City reserves the right of final determination regarding specific Items of Work and if Special Provisions will be required to the satisfactorily detail and describe the work.

The consultants shall also prepare all necessary permit applications (including all required supporting materials) from all approving agencies including, but not limited to, the MDEQ and Washtenaw County Water Resources Commission (WCWRC.)

3. Prepare complete, detailed, and accurate traffic control plans meeting the requirements of the Michigan Manual of Uniform Traffic Control Devices (MMUTCD), Norfolk-Southern Railroad, Amtrak, and the City of Ann Arbor to complete the project. Continuous pedestrian and bicycle traffic shall be maintained throughout the project limits at all times on at least one side of each bridge and/or roadway.
4. The Consultant shall coordinate their efforts with the City to ensure the timely and cost-effective submittal of the project deliverables. The Consultant's Project Manager shall provide full oversight, review, and coordination of their project deliverables with that of their internal staff and sub-consultants such that a seamless product is provided and all deadlines are met.
5. The Consultant shall perform a detailed, hands-on, bridge inspection of all structural members in order to obtain the necessary information to determine all needed repair

measures, calculate accurate and complete construction quantities, and to properly prepare the plans and specifications.

6. The Consultant shall sample and classify the existing paint on the bridge; investigate the history of the structures; determine the location(s) of previous additions to structural members where conduits have been added; identify specific locations where structural members are in need of repair or replacement; and, identify the location, extent, and quantity of delaminations on the bridge decks, sidewalk areas, and substructure units by reviewing the previously completed infrared scans and augmenting that data with hand soundings as required. The Consultant shall obtain all required right-of-entry, inspection permits, and the like in order to be able to perform the inspections and thoroughly and completely scope the needed rehabilitation measures.
6. Develop a comprehensive Environmental Protection Plan including containment requirements and storage and disposal requirement for any hazardous materials that may be discovered to exist (it is possible, but not expected, that lead paint may be encountered on the existing superstructure members) in accordance with Federal and State requirements.
7. Identify potential limits on construction methods and practices (such as identifying potential staging areas, limits of where construction activity can, or cannot, occur in the surrounding area, roads/bridges that are not accessible by the contractor, etc.).
8. Perform a detailed quantity estimate for all work included in the project. Detailed calculations shall be submitted to the City for review. The detailed quantity estimate will be included in the contract documents.
9. All plan sheets shall be drawn and prepared in accordance with the City of Ann Arbor Public Services Area Drafting Standards. All scales shall be approved by the City of Ann Arbor Project Management Services Unit. The format of the drawings shall be completely compatible with the City's drawing preparation standards and layout(s). The City is using AutoCAD 2013 Civil 3D and it is expected that all drawings will be provided in a compatible format without the need to reconfigure drawings for plotting or other purposes.
10. Coordinate all elements of the design with all affected parties, including, but not limited to; various City Departments, the University of Michigan and the University Medical Center, Norfolk-Southern Railroad, Amtrak, private utility companies, other formal and informal committees, and the public in general.
11. Develop and implement a Public Information-sharing process with all interested and relevant stakeholders throughout the duration of the project. The process shall include, at a minimum:
  - a) public updates and collaboration, possibly including public workshops with key stakeholders
  - b) presentation(s) of final design and project schedule

12. Any other items that the Consultant feels are necessary so that when the design is 100% complete, all needed work is detailed on the drawings and fully described in the project specifications.
13. Schedule and chair monthly design progress meetings and at, or near milestone, dates in order to assure proper communication of project goals and objectives and to assure the timely completion of the project. This is to include a design kick-off meeting in which all affected parties to the design will be contacted and invited to attend. Prepare and distribute meeting minutes for all progress and coordination meetings.

### **INFORMATION AVAILABLE**

Record drawings of the existing bridge structures, surrounding roadway improvements, and biennial bridge inspection reports for each structure are available for review and copying. Structure Inventory and Appraisal (SIA) and Bridge Inspection Report (BIR) forms are available, as well as Bridge Deck Delamination surveys, previous repair cost estimates, and other related materials are available too.

Record drawings of the existing public underground utilities including storm and sanitary sewers within the limits of the project are available for review. Quarter Section drawings detailing the locations of the existing water mains in and around the project area along with water main break histories are available for review as well. In addition, some soil boring logs are also available for the area surrounding the project as well.

**SECTION III**

3. State history of the firm, in terms of length of existence, types of services provided, etc.. Identify the technical details which make the firm uniquely qualified for this work.

B. Past involvement with Similar Projects – 20 points

The written proposal must include a list of specific experience in the project area and indicate proven ability in developing detailed designs and implementing similar projects for the firm **and** the individuals to be involved in the project. The proposal should also indicate the ability to have projects completed within the budgeted amounts. A summary of related projects with the original deadline and cost estimate versus the actual design completion date and final cost of the design is required with this section. A complete list

of client references must be provided for similar projects recently completed. It shall including the firm/agency name, address, telephone number, project title, and contact person is required.

C. Proposed Work Plan – 50 points

A detailed work plan is to be presented which lists all tasks determined to be necessary to accomplish the work of this project. Additional project elements suggested by the Proposer are to be included in the work plan and identified as Proposer suggested elements.
2. The work plan must identify information the Proposer will need from City staff in order to complete the project. Include estimated time and resource commitment from City staff.
3. The work plan shall include any other information that the Proposer believes to be pertinent but not specifically asked for elsewhere.
4. Also include in the work plan all proposed steps, if any, to expedite completion of the project. This will be given due consideration during evaluation of proposals.

In the scoring for this section, consultants shall be evaluated on the clarity, thoroughness, and content of their responses to the above items.

D. Fee Proposal - 15 points

1. Fee quotations shall be submitted in a separate, sealed, envelope as part of the proposal. Fee quotations are to include the names, title, hourly rates, overhead factors, and any other details, including hours of effort for each team member by task, and sub-task, by which the overall and project element costs have been derived. The fee quotation is to relate in detail to each item of the proposed work plan. Consultants shall be capable of justifying the details of the fee proposal relative to personnel costs, overhead, how the overhead rate is derived, material and time.
2. The fee proposed must include the total estimated cost for the project when it is 100% complete. This total may be adjusted after negotiations with the City and prior to signing a formal contract, if justified. A sample of the required City/Consultant agreement form is included as Attachment A in Section IV of this RFP.

E. Authorized Negotiator

Include the name, phone number, and e-mail address of persons(s) in your organization authorized to negotiate the Scope of Work with the City.

F. Attachments

Legal Status of Proposer, Living Wage Compliance Form and the Contract Compliance Form must be completed and returned with the proposal. These elements should be included as attachments to the proposal submission.

G. Proposal Evaluation

1. The Selection Committee will evaluate each proposal by the above described criteria and point system (A through C, based on 85 points) to select a short-list of firms for further consideration. The City reserves the right to not consider any proposal which it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The Committee may contact references to verify material submitted by the Proposers.
2. The Committee then will schedule the interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal. The interview must include the project team members expected to complete a majority of work on the project, but no more than 6 members total. The interview shall consist of a presentation of up to forty-five (35) minutes by the Proposer, including the person who will be the project manager on this Contract, followed by approximately forty-five (40) minutes of questions and answers. Audiovisual aids may be used during the oral interviews. The oral interviews may be recorded on tape by the Evaluation Team.
3. The firms interviewed will then be re-evaluated by the above criteria (A through D), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to not consider any proposal which is determined to be unresponsive and deficient in any of the information requested for evaluation. The City also reserves the right to waive the interview process and evaluate the consultants based on their proposals and fee schedules alone.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this Request for Proposal, a portion of the scope, or a revised scope.

#### INSTRUCTIONS FOR CONTRACTORS FOR COMPLETING CONTRACT COMPLIANCE FORM

##### City Policy

The “non discrimination in contracts” provision of the City Code, (Chapter 112, Section 9:161) requires contractors/vendors/grantees doing business with the City not to discriminate on the basis of actual or perceived race, color, religion, national origin, sex, age, condition of pregnancy, marital status, physical or mental limitations, source of income, family responsibilities, educational association, sexual orientation, gender identity or HIV status against any of their employees, any City employee working with them, or

any applicant for employment. It also requires that the contractors/vendors/grantees include a similar provision in all subcontracts that they execute for City work or programs.

This Ordinance further requires that each prospective contractor/vendor submit employment data to the City showing current total employee breakdown by occupation, race and gender. This allows the Human Rights Office to determine whether or not the contractor/vendor has a workforce that is reflective of the availability of women and under-represented minorities within the contractor’s labor recruitment area (the area where they can reasonably be expected to recruit employees). ***This data is provided to the City on the Human Rights Contract Compliance Forms (attached).***
