SAFETY NOTES

Safety Update Cold weather seems to be delayed this year, but it will come eventually. Cold weather driving often means traveling on snowy, icy, or slushy roads. Follow these tips to stay safe while driving in winter weather.

- **Tires:** Ensure your tires are in optimal condition for winter driving. Check the tread depths and consider investing in winter tires for increased traction.
- **Slow down:** Always adjust your speed down to account for less traction when driving on snow or ice.
- **Accelerate and decelerate slowly:** Gentle and gradual acceleration and braking is key in winter conditions. Don't try to get moving in a hurry and take time to slow down for a stoplight.
- **Increase your following distance:** to five to six seconds. This increased margin of safety will provide the longer distance needed if you have to stop.
- **Drive defensively:** Anticipate hazards on the road and prepare for sudden changes by maintaining focus.
- **Clear visibility:** Remove snow and ice from your vehicle before hitting the road.
- **Stay home:** Don't drive in severe conditions if you don't have to or consider delaying travel until condition improve.

Thank you for making A2 Be Safe!

Since then, thousands of Ann Arborites have celebrated the milestone at monthly events and paid tribute with celebratory tree plantings, a park renaming, a new city flag design and park murals.
