Chapter 70
Manufactured Fertilizer Ordinance
Commercial and Institutional Applicator Registration

Note: the following comments are intended only as a summary guide. Applicators are responsible for compliance with the full, official text of the Manufactured Fertilizer Ordinance (Ann Arbor City Code, Chapter 70).

The Manufactured Fertilizer Ordinance requires commercial and institutional applicators of manufactured fertilizer to register with the City each calendar year before applying manufactured fertilizer to any general (non-agricultural) turf in the City. A commercial applicator includes any person who applies manufactured fertilizer in exchange for money, goods, services, or other valuable consideration. An institutional applicator includes any person who applies manufactured fertilizer to general turf areas of more than 1 acre, excluding owners of individual parcels zoned single-family. Manufactured fertilizer is any commercially manufactured substance containing plant nutrients that is designed for promoting plant growth, but does not include unmanipulated animal and vegetable manures, marl, lime, limestone, and wood ashes.

- *All commercial and institutional applicators shall register with the City prior to applying manufactured fertilizer on any general turf in the City in any calendar year.*
- *Manufactured fertilizer that contains any amount of phosphorus or a compound containing phosphorus, such as phosphate, shall not be applied to general turf within the City, except under one or both of the following conditions:*
 - *Application of manufactured fertilizer to an area where general turf is being established from seed or sod, during the first growing season of the seed or sod.*
 - *Application of manufactured fertilizer that is exempt under section 6:405 of this chapter.*
- *Manufactured fertilizer containing any amount of phosphorus or a compound containing phosphorus shall be watered into the soil within 14 hours of application so that the fertilizer is immobilized and prevented from loss by runoff.*
- *Manufactured fertilizer shall not be applied prior to April 1 or after November 15 in any year due to the inability of frozen soil to absorb nutrients, unless the soil temperature at a depth of 2 inches has been measured and is greater than 37° Fahrenheit.*
- *Manufactured fertilizers shall not be applied or stored uncontained on driveways, parking lots, streets, sidewalks, or other impervious surfaces, unless removed within one hour of application or storage.*
- *Manufactured fertilizer shall not be applied in any natural features open space as defined in Chapter 55, or within 25 feet of any wetland, watercourse, or storm water retention or detention basin.*
- *Commercial and institutional applicators shall submit a report regarding the application of manufactured fertilizer containing phosphorus and compounds containing phosphorus, to the Fertilizer Program Administrator by December 15 of the year following the end of the fertilizer season. The report shall contain the addresses or block locations (e.g., 100 block of North Fifth) of all general turf areas where manufactured fertilizer containing phosphorus or a compound containing phosphorus were applied, the date of application, the phosphorus content of the fertilizer and the date and results from soil tests where required by section 6:405 of this ordinance.*
- *A commercial applicator shall provide at least one copy of the informational pamphlet to the owner or occupant of each address where the commercial applicator applies manufactured fertilizer prior to the application of fertilizer for that calendar year, except only one informational pamphlet is required to be provided for multiple addresses on one parcel of land with the same ownership, such as apartments.*
- *Registration shall begin on January 1 and shall expire on December 31 of each calendar year. Commercial and institutional applicators shall submit a complete registration application to the Fertilizer Program Administrator on forms furnished by the City Clerk, along with the registration fee according to the schedule established by resolution of City Council. The fee shall be calculated to include the cost of registration application review and periodic field inspection.*
