

WATER & WASTEWATER SYSTEM CAPITAL COST RECOVERY STUDY

The Water & Wastewater System Capital Cost Recovery Study will establish an equitable, understandable, defensible cost recovery philosophy and fee structure for customers connecting to the city's water main and/or sanitary sewer systems.

Fee Structure Objectives

- ✓ Equitable: does everyone pay a fair share?
- ✓ Understandable: does everyone know how it works?
- ✓ Defensible: is it legal?
- ✓ Simple: is it easy to administer?
- ✓ Does it cover the cost to build and maintain the systems?
