

**ADDENDUM No. 1**  
**RFP 879, Geddes Avenue Improvements**  
**City of Ann Arbor**  
**Due: Wednesday, November 27, 2013, by 10:00 AM EDT**

The following changes, additions, and/or deletions shall be made to the Request for Proposal for Geddes Avenue Improvements, RFP No. 879, on which proposals will be received on or before Wednesday, November 27, 2013, by 10:00 AM EDT.

The information contained herein is being provided to assist potential respondents in the review of the RFP. This Addendum includes 1 page.

Respondents are directed to take note in its review of the documents of the following questions and City responses as they affect work or details in other areas not specifically referenced here.

**Questions and Answers**

The following Questions have been received by the City. Responses are being provided in accordance with the terms of the RFP.

Q. I am unsure of the POE (Point of Ending) for the road portion of the project. The RFP says Huron Parkway, does this mean including the loop "ramp" all the way to Huron Parkway. Or it appears that Geddes has been improved, including bike lanes from near Hickory Lane to Huron Parkway. Is Hickory Lane the POE?

A. If that makes sense, then yes. Just note in your proposal that you looked at it and assumed the Hickory Lane was the POE.

Q. I thought you mentioned that the City surveyed this area in 2010. Is it the intent to resurvey the area or use what the City has and supplement the existing info? If we are reusing the topo, can we view the file?

A. The extent of any new survey and the possible incorporation of the City's existing survey are to be determined by the Consultant. Additional or redundant survey as required to complete the design should be included in the submitted proposal. The Consultant will be solely responsible for the accuracy of the survey.

An AutoCad dwg file of the survey can be obtained by emailing Liz Rolla.
