Architectural Style: Colonial Revival
Number of Stories: 2
Material: Clapboard
Window Type: Double-hung
Plan Shape: Irregular
Roof Shape: Cross gabled
Roof Material: Asphalt
Dormer Type: None
Front Porch Type: Stoop

Details: Use of front gable with plain pediment with small round window and corner pilasters gives appearance of temple front building (although without portico). Neo-classical form made to echo a true Greek Revival house which used to stand next door (the Lloyd House of 1735 Washtenaw, Alice Crocker's sister & brother-in-law).

Original Use: Residential
Current Use: Residential

First Directory: 1927

Architect: Unknown

Notes: Alice Crocker was the aunt of Alice Lloyd, UM Dean of Women.

Architectural Style: Craftsman
Number of Stories: 2
Material: Stucco
Window Type: Double-hung
Plan Shape: Rectangular
Roof Shape: Hipped
Roof Material: Asphalt

Front Porch Type: Canopy

Details: Large square house on a rise, very similar to its neighbor at 1942. Lots of trees surrounding house.

Original Use: Residential
Current Use: Residential

First Directory: 1909

Architect: Emil Lorch

Notes: Built in 1907-08 in the Craftsman style, this house is very similar in its exterior appearance and massing to its neighbor at 1942 Cambridge. These two houses on a rise surrounded by tall trees make a dramatic visual statement. Originally numbered 725 New Jersey Ave., the street name was changed to Cambridge in 1910 and the house renumbered in 1916. Although occupied briefly in 1909 by Philosophy Professor Louville Eugene Emerson and his wife Mary, this house has been in the Guthe-Hildebrandt family since late 1909. Karl Eugen Guthe and his wife Belle took up residence in 1909 and purchased the house in 1911. Karl Guthe was an instructor and then Professor of Physics at the University of Michigan for some 20 years. After Professor Guthe's death, the house was variously occupied by Mrs. Guthe, their son Carl, and her niece Dora Hildebrandt (and her husband Theophil). Professor Hildebrandt purchased the house in 1927. He was a Professor of Mathematics and a Chairman of the Department. Today the house is occupied by Professor Hildebrandt's son and his family.

Notes: This house was built for University of Michigan Professor of Chemistry and Metallurgical Engineering, George G. Brown and his wife Dorothy. Dr. Brown had been with the UM since 1920 and became Chairman of the Department of Chemistry and Metallurgical Engineering in 1942. Internationally known for his research in the field of petroleum fuels, Dr. Brown was appointed in 1949 as Director of Engineering for the Reactor Division of the U.S. Atomic Commission. In 1951, he became Dean of the College of Engineering. At the time of his death in August 1957, Dr. Brown still held the title of Edward deMille Campbell Professor of Chemistry and Engineering, and was still Dean of the College. Shortly after his death, the G.G. Brown Laboratory on the University's North Campus was named in his honor. Today his house is used by the Corntree Child Care organization.

Notes: This unusual shingle house was built for Wilfred B. Shaw and his wife Marion. Shaw served as the Secretary of the University of Michigan, but was renowned for his literary accomplishments, especially in the area of the University's history. He published, in 1920, a history of the UM, and in 1929 published *Alumni and Adult Education*. Perhaps his most noted accomplishment was as editor of the important and invaluable series of volumes entitled *The University of Michigan - An Encyclopedic Survey*, published between 1942-1958. Shaw was also deeply involved with the Alumni Association of the UM, serving both as General Secretary of the Association, and as its Director. He was editor for 25 years of the *Michigan Alumnus* journal, and founder and editor of the *Michigan Alumnus Quarterly Review*.
