Appendix A: Complete Survey Responses

Responses excluding “don’t know”

The following pages contain a complete set of responses to each question on the survey, excluding the “don’t know” responses. The percent of respondents giving a particular response is shown followed by the number of respondents (denoted with “N=”).

Table 1: Question 1

Please rate each of the following aspects of quality of life in Ann Arbor:	Excellent		Good		Fair		Poor		Total	
Ann Arbor as a place to live	59%	N=464	34%	N=269	6%	N=47	0%	N=2	100%	N=782
Your neighborhood as a place to live	50%	N=388	40%	N=312	8%	N=61	2%	N=19	100%	N=780
Ann Arbor as a place to raise children	58%	N=373	34%	N=220	8%	N=50	0%	N=2	100%	N=645
Ann Arbor as a place to work	43%	N=304	42%	N=292	12%	N=88	3%	N=18	100%	N=701
Ann Arbor as a place to visit	44%	N=331	37%	N=278	16%	N=123	3%	N=23	100%	N=756
Ann Arbor as a place to retire	39%	N=233	29%	N=176	21%	N=128	11%	N=64	100%	N=600
The overall quality of life in Ann Arbor	47%	N=370	46%	N=355	6%	N=50	1%	N=5	100%	N=780

Table 2: Question 2

Please rate each of the following characteristics as they relate to Ann Arbor as a whole:	Excellent		Good		Fair		Poor		Total	
Overall feeling of safety in Ann Arbor	38%	N=296	54%	N=418	8%	N=59	1%	N=8	100%	N=781
Overall ease of getting to the places you usually have to visit	24%	N=184	47%	N=369	22%	N=173	7%	N=51	100%	N=777
Quality of overall natural environment in Ann Arbor	49%	N=381	42%	N=323	8%	N=62	1%	N=12	100%	N=777
Overall "built environment" of Ann Arbor (including overall design, buildings, parks and transportation systems)	22%	N=169	51%	N=396	22%	N=171	6%	N=44	100%	N=780
Health and wellness opportunities in Ann Arbor	51%	N=388	39%	N=300	10%	N=76	0%	N=3	100%	N=768
Overall opportunities for education and enrichment	67%	N=514	28%	N=214	3%	N=23	1%	N=11	100%	N=761
Overall economic health of Ann Arbor	34%	N=255	51%	N=383	13%	N=94	2%	N=15	100%	N=747
Sense of community	28%	N=210	45%	N=340	21%	N=158	6%	N=45	100%	N=754
Overall image or reputation of Ann Arbor	47%	N=368	44%	N=341	7%	N=52	2%	N=14	100%	N=775

Table 3: Question 3

Please indicate how likely or unlikely you are to do each of the following:	Very likely		Somewhat likely		Somewhat unlikely		Very unlikely		Total	
Recommend living in Ann Arbor to someone who asks	64%	N=491	28%	N=217	6%	N=47	2%	N=17	100%	N=772
Remain in Ann Arbor for the next five years	48%	N=361	29%	N=221	12%	N=87	11%	N=85	100%	N=754

Table 4: Question 4

Please rate how safe or unsafe you feel:	Very safe		Somewhat safe		Neither safe nor unsafe		Somewhat unsafe		Very unsafe		Total	
In your neighborhood during the day	84%	N=653	13%	N=102	1%	N=10	1%	N=4	1%	N=6	100%	N=774
In Ann Arbor's downtown/commercial area during the day	69%	N=529	25%	N=195	4%	N=31	1%	N=8	1%	N=5	100%	N=767

The National Citizen Survey™

Table 5: Question 5

Please rate each of the following characteristics as they relate to Ann Arbor as a whole:	Excellent		Good		Fair		Poor		Total	
	%	N	%	N	%	N	%	N	%	N
Traffic flow on major streets	6%	N=44	34%	N=260	38%	N=292	23%	N=179	100%	N=775
Ease of public parking	7%	N=50	33%	N=244	37%	N=276	24%	N=179	100%	N=750
Ease of travel by car in Ann Arbor	9%	N=68	43%	N=331	34%	N=257	14%	N=106	100%	N=762
Ease of travel by public transportation in Ann Arbor	14%	N=82	47%	N=285	29%	N=176	10%	N=61	100%	N=604
Ease of travel by bicycle in Ann Arbor	13%	N=79	45%	N=276	30%	N=181	12%	N=71	100%	N=607
Ease of walking in Ann Arbor	37%	N=282	46%	N=350	14%	N=111	3%	N=23	100%	N=766
Availability of paths and walking trails	32%	N=239	48%	N=354	17%	N=128	3%	N=24	100%	N=746

Both	11%	N=84
Total	100%	N=754

Appendix B: Benchmark Comparisons

Comparison Data

NRC’s database of comparative resident opinion is comprised of resident perspectives gathered in surveys from over 500 communities whose residents evaluated the same kinds of topics on The National Citizen Survey™. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. The City of Ann Arbor chose to have comparisons made to the entire database as well as a subset of similar jurisdictions (University communities).

Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Ann Arbor’s “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “essential” and “very important,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month. The second column is the rank assigned to Ann Arbor’s rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Ann Arbor’s rating to the benchmark.

In that final column, Ann Arbor’s results are noted as being “higher” than the benchmark, “lower” than the benchmark or “similar” to the benchmark, meaning that the average rating given by Ann Arbor residents is statistically similar to or different (greater or lesser) than the benchmark. More extreme differences are noted as “much higher” or “much lower.”

Benchmark Database Characteristics	
Region	Percent
New England	3%
Middle Atlantic	5%
East North Central	15%
West North Central	13%
South Atlantic	22%
East South Central	3%
West South Central	7%
Mountain	16%
Pacific	16%
Population	Percent
Less than 10,000	10%
10,000 to 24,999	22%
25,000 to 49,999	23%
50,000 to 99,999	22%
100,000 or more	23%

National Benchmark Comparisons

Table 63: Community Characteristics General

	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
The overall quality of life in Ann Arbor	93%	48	397	Higher

Appendix C: Detailed Survey Methods

The National Citizen Survey (The NCS™), conducted by National Research Center, Inc., was developed to provide communities an accurate, affordable and easy way to assess and interpret resident opinion about important local topics. Standardization of common questions and survey methods provide the rigor to assure valid results, and each community has enough flexibility to construct a customized version of The NCS.

Results offer insight into residents' perspectives about the community as a whole, including local amenities, services, public trust, resident participation and other aspects of the community in order to support budgeting, land use and strategic planning and communication with residents. Resident demographic characteristics permit comparison to the Census as well as comparison of results for different subgroups of residents. The City of Ann Arbor funded this research. Please contact Lisa Wondrash of the Ann Arbor Communications office at LWondrash@a2gov.org if you have any questions about the survey.

Survey Validity

The question of survey validity has two parts: 1) how can a community be confident that the results from those who completed the questionnaire are representative of the results that would have been obtained had the survey been administered to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

To answer the first question, the best survey research practices were used for the resources spent to ensure that the results from the survey respondents reflect the opinions of residents in the entire community. These practices include:

- Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent. A higher response rate lessens the worry that those who did not respond are different than those who did respond.
- Selecting households at random within the community to receive the survey to ensure that the households selected to receive the survey are representative of the larger community.
- Over-sampling multi-family housing units to improve response from hard-to-reach, lower income or younger apartment dwellers.
- Selecting the respondent within the household using an unbiased sampling procedure; in this case, the "birthday method." The cover letter included an instruction requesting that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.
- Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- Inviting response in a compelling manner (using appropriate letterhead/logos and a signature of a visible leader) to appeal to recipients' sense of civic responsibility.
- Providing a pre-addressed, postage-paid return envelope.
- Offering the survey in Spanish or other language when requested by a given community.
- Weighting the results to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record his or her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g., reporting tolerant behaviors toward "oppressed groups," likelihood of voting for a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), his or her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), his or her confidence that he or she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g., driving habits), reported intentions to behave with observed future behavior (e.g., voting choices) or reported opinions about current community quality

with objective characteristics of the community (e.g., feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g., family abuse or other illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality vary, with some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of firefighters, breadth of services and training provided). Resident opinion commonly reflects objective performance data but is an important measure on its own. NRC principals have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

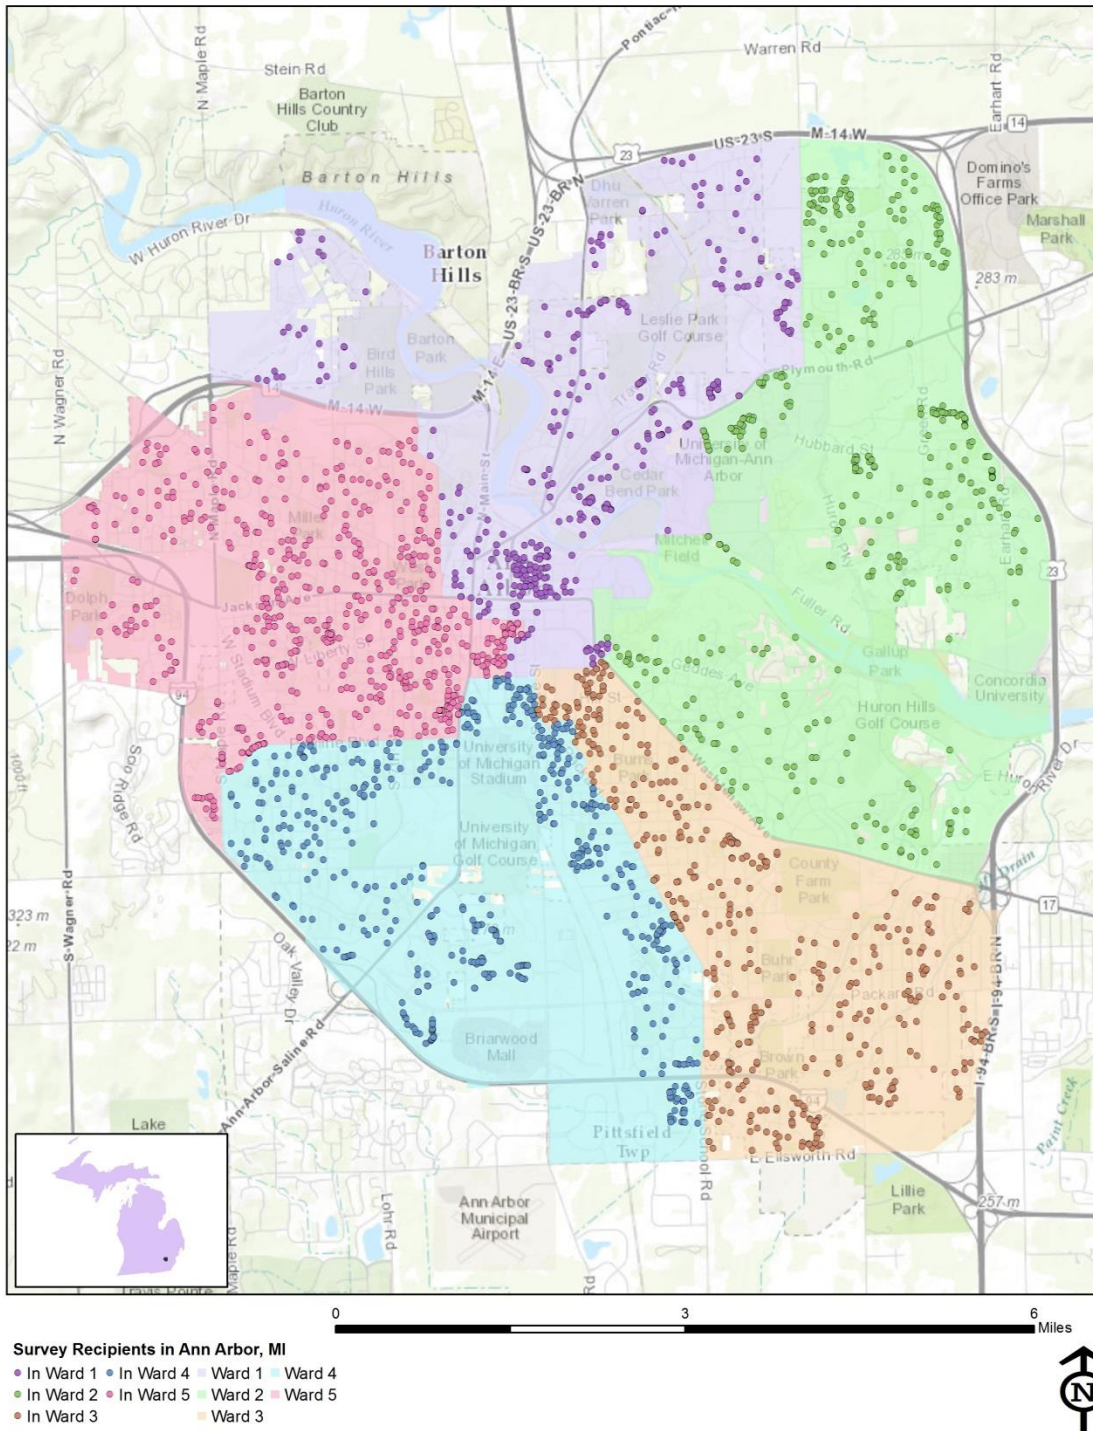

Survey Sampling

"Sampling" refers to the method by which households were chosen to receive the survey. All households within the City of Ann Arbor were eligible to participate in the survey. A list of all households within the zip codes serving Ann Arbor was purchased based on updated listings from the United States Postal Service. Since some of the zip codes that serve the City of Ann Arbor households may also serve addresses that lie outside of the community, the exact geographic location of each housing unit was compared to community boundaries using the most current municipal boundary file (updated on a quarterly basis) and addresses located outside of the City of Ann Arbor boundaries were removed from consideration. Each address identified as being within City boundaries was further identified as being within one of the five Wards.

To choose the 3,000 survey recipients, a systematic sampling method was applied to the list of households previously screened for geographic location. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every *Nth* one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were over sampled as residents of this type of housing typically respond at lower rates to surveys than do those in single-family housing units. Figure 1 displays a map of the households selected to receive the survey. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density). While the theory of probability assumes no bias in selection, there may be some minor variations in practice (meaning, an area with only 15% of the housing units might be sampled at an actual rate that is slightly above or below that).

An individual within each household was selected using the birthday method. The birthday method selects a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

Figure 1: Location of Survey Recipients

Survey Administration and Response

Selected households received three mailings, one week apart, beginning on September 10, 2015. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the Mayor inviting the household to participate, a questionnaire and a postage-paid return envelope. The final mailing contained a reminder letter, another survey and a postage-paid return envelope. The second cover letter asked those who had not completed the survey to do so and those who had already done so to refrain from turning in another survey; respondents could opt to take the survey online. Completed surveys were collected over the following seven weeks.

The National Citizen Survey™

About 4% of the 3,000 surveys mailed were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the remaining 2,885 households that received the survey, 785 completed the survey, providing an overall response rate of 27%. Of the 785 completed surveys, 78 were completed online. Additionally, responses were tracked by Ward; response rates by Ward ranged from 18% to 33%.

Table 75: Survey Response Rates by Ward

	Number mailed	Undeliverable	Eligible	Returned	Response rate
Ward 1	633	22	611	107	18%
Ward 2	492	12	480	148	31%
Ward 3	497	22	475	147	31%
Ward 4	633	26	607	151	25%
Ward 5	745	33	712	232	33%
Overall	3,000	115	2,885	785	27%

Confidence Intervals

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents’ opinions are relied on to estimate all residents’ opinions.¹

The margin of error for the City of Ann Arbor survey is no greater than plus or minus four percentage points around any given percent reported for the entire sample (785 completed surveys).

For subgroups of responses, the margin of error increases because the sample size for the subgroup is smaller. For subgroups of approximately 100 respondents, the margin of error is plus or minus 10 percentage points.

Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and “cleaned” as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

Survey Data Weighting

The demographic characteristics of the survey sample were compared to those found in the 2010 Census and American Community Survey estimates for adults in the City of Ann Arbor. The primary objective of weighting survey data is to make the survey sample reflective of the larger population of the community. The characteristics used for weighting were housing type (attached or detached), housing tenure (rent or own), race, sex, age and ward. The results of the weighting scheme are presented in the following table.

¹ A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the “true” population response. This theory is applied in practice to mean that the “true” perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents rate a service as “excellent” or “good,” then the 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of uncertainty is called sampling error. In addition to sampling error, other sources of error may affect any survey, including the non-response of residents with opinions different from survey responders. Though standardized on The NCS, on other surveys, differences in question wording, order, translation and data entry, as examples, can lead to somewhat varying results.

The National Citizen Survey™

Table 76: Ann Arbor, MI 2015 Weighting Table

Characteristic	Population Norm	Unweighted Data	Weighted Data
Housing			
Rent home	55%	32%	54%
Own home	45%	68%	46%
Detached unit	43%	57%	44%
Attached unit	57%	43%	56%
Race and Ethnicity			
White	74%	81%	74%
Not white	26%	19%	26%
Not Hispanic	96%	97%	97%
Hispanic	4%	3%	3%
Sex and Age			
Female	51%	59%	52%
Male	49%	41%	48%
18-34 years of age	49%	21%	48%
35-54 years of age	26%	28%	26%
55+ years of age	24%	51%	25%
Females 18-34	24%	13%	26%
Females 35-54	14%	15%	12%
Females 55+	14%	31%	13%
Males 18-34	26%	8%	22%
Males 35-54	13%	12%	14%
Males 55+	11%	21%	12%
Area			
Ward 1	18%	14%	17%
Ward 2	17%	19%	17%
Ward 3	18%	19%	18%
Ward 4	22%	19%	22%
Ward 5	25%	30%	25%

Survey Data Analysis and Reporting

The survey dataset was analyzed using the Statistical Package for the Social Sciences (SPSS). For the most part, the percentages presented in the reports represent the “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “essential” and “very important,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month.

On many of the questions in the survey respondents may answer “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the reports. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

Appendix D: Survey Materials

Dear Ann Arbor Resident,

It won't take much of your time to make a big difference!

Your household has been randomly selected to participate in a survey about your community. Your survey will arrive in a few days.

Thank you for helping create a better City!

Sincerely,

Christopher Taylor
Mayor

September 2015

Dear City of Ann Arbor Resident:

Please help us shape the future of Ann Arbor! You have been selected at random to participate in the 2015 Ann Arbor Citizen Survey.

Please take a few minutes to fill out the enclosed survey. Your participation in this survey is very important – especially since your household is one of only a small number of households being surveyed. Your feedback will help us make decisions that will affect Ann Arbor for years to come.

A few things to remember:

- **Your responses are completely anonymous.**
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- **You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:**

www.n-r-c.com/survey/annarbor2015.htm

If you have any questions about the survey please call 734-794-6152.

Thank you for your time and participation!

Sincerely,

Christopher Taylor
Mayor

The City of Ann Arbor 2015 Citizen Survey

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Please select the response (by circling the number or checking the box) that most closely represents your opinion for each question. Your responses are anonymous and will be reported in group form only.

1. Please rate each of the following aspects of quality of life in Ann Arbor:

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Ann Arbor as a place to live.....	1	2	3	4	5
Your neighborhood as a place to live.....	1	2	3	4	5
Ann Arbor as a place to raise children.....	1	2	3	4	5
